-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 05/21/2007.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## DETAILED ACTION

### *Election/Restrictions*

1. Applicant's election without traverse of claims 27, 29, 30, 33, 35, and 36 in the reply filed on 05/21/2007 is acknowledged.

### *Claim Rejections - 35 USC § 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 27 and 33 are rejected under 35 U.S.C. 102(e) as being anticipated by Michot (US 20030054836 A1).

Re claims 27 and 33: Michot discloses a method for facilitating performance tracking comprising: creating a project task, associated with a resource, using a user interface; using a transponder, presented by the resource, to communicate a transponder identifier to a radio frequency identification (RFID) reader via a radio frequency signal; communicating the transponder identifier from the reader to a resource engine; associating the transponder identifier with a first time value and a resource identifier corresponding to the resource (i.e., when the employee enters the work site); using the transponder to communicate the transponder identifier to the reader for a second time; communicating the transponder identifier from the reader to the

Art Unit: 2876

resource engine for a second time; associating the transponder identifier with a second time value and the resource identifier corresponding to the resource(i.e., when the employee exits the work site); computing a task work time representing a time period that the resource was in a work environment, based at least on the first time value and the second time value; and associating the resource identifier and the task work time with the project task in the resource engine (paragraphs [0003-0016]).

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 27, 29-30, 33 and 35-36 are rejected under 35 U.S.C. 102(b) as being anticipated by Dwyer et al (US 5864306 A).

Re claims 27, 29-30, 33 and 35-36: Dwyer et al discloses a transponder-reader performance tracking system comprising: a user interface operable to allow a user to create a project task, associated with a resource; a transponder, associated with the resource, operable to communicate a transponder identifier to a radio frequency identification (RFID) reader via a radio frequency signal; a resource engine operable to receive the transponder identifier communicated by the reader, the resource engine further operable to associate the transponder identifier with a first time value and a resource identifier corresponding to the resource (i.e., when the vehicle enters the toll), to associate the transponder identifier with a second time value and the resource identifier corresponding to the resource (i.e., when the vehicle exits the toll), to compute a task work time representing a time period that the resource was in a work

Art Unit: 2876

environment, based at least on the first time value and the second time value, and to associate the resource identifier and the task work time with the project task (fig. 1; col. 3, lines 13-64).

***Claim Rejections - 35 USC § 103***

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).
